Education Background

2023 **Diploma of IT - Web Development**
Coder Academy

2022 **Bachelor of Psychology (Distinction)**
Bachelor of Justice
Queensland University of Technology

2014 **Diploma of Justice**
TAFE Southbank

Tech Skills

- Python, JavaScript, HTML, CSS
- SQL, PostgreSQL, MySQL, Flask
- Node, Express, React, MongoDB
- VS Code, Vercel
- GitHub Version Control
- Adobe Premiere
- Windows, Linux, MacOS

Soft Skills

- Communication and Collaboration
- Creativity and Problem Solving
- Time Management and Organisation
- Self-Awareness and Self-Management
- Critical Thinking and Flexibility

About Me

Dedicated and driven to be a full stack developer, I've applied myself in a range of settings in order to grow my skillset, challenge myself, and always look for an opportunity to learn.

I'm capable in designing and developing web pages, coding and testing terminal and web apps, utilising version control, and deploying to a live site.

I've excelled in many previous roles that required collaboration, self-management and strong communication skills.

Projects

'Spooky Woods': A text-based terminal game

github.com/mpichlmann/Spooky_Woods

- This is a text based adventure/horror game that runs inside your terminal. The player has the ability to choose. different paths, explore several areas, solve puzzles and riddles, and achieve multiple endings depending on the choices they make.
- During the development of this game I improved my knowledge of python loops, conditional statements, and variable scope.
- Built using Python and VS Code along with the pygame and coloured packages.

Planetary API: A simple RESTful API built with Flask

github.com/mpichlmann/planetary-api

- This is a side project I completed in order to better understand how to set up a RESTful API with Flask.
- The API links to a database that stores users and planets, as well as allowing standard CRUD commands to be performed on both.
- The API utilises JSON web tokens in order to authenticate users before allowing changes to be made to the database.
- Built using Python, Flask, Marshmallow, JavaScript Web Tokens and VS Code.

My Portfolio Website: A webpage representation of myself

maximillian-pichlmann-t1-a2.vercel.app

- A website that was designed and developed by myself with the purpose of showcasing my abilities as a developer as well as represent my own personal style.
- During the development process I learned the importance of semantic HTML, responsive web design, and the proper use of style sheets.
- Built using HTML/CSS and VS Code, and deployed on Vercel.

Achievements

- Completed Therapy and Administration Volunteer-ship.
- Achieved highest results in Statistical Research Methods course.
- Achieved 1# salesperson in QLD/NSW region on 4 occasions.
- Achieved top 5 sales in QLD/NSW region for 5 consecutive weeks.

Certificates

- Completed 'Building RESTful APIs' linkedin course.
- Completed HLTAID001 'Cardiopulmonary Resuscitation' training.
- Acquired Working with Children Blue Card.
